# 2017 Tree Seedling Sale

## Order Form

Blue Crop Blueberry is a midseason variety that produces medium size fruit with high sugar content. Berries are great for eating fresh, canning or freezing. 5-6 ft.

Cumberland Black Raspberry plants produce medium-large, blue-black berries, which have an outstanding raspberry flavor. It's good for eating fresh, making jams and jellies, and will survive in cold areas. It shows great winter hardiness and the fruit ripens July to August.

Latham Red Thornless Raspberry are extra large, extra fine, bright red berries that are firm with superior appearance and flavor. Big yields that are fine for freezing, cooking and dessert that are ready midseason.

Common Lilac is an early blooming plant with compact branching that produces fragrant lilac-lavender single flowers. 8-12 ft.

Milkweed Plants are host plants for the Monarch Butterfly. Monarchs only lay their eggs on milkweed plants and are the only source of food for the caterpillar, or larvae. We have three species available.

Allegheny Serviceberry is a small tree reaching up to 25 ft. Produces white flowers and red to purplish black fruit. Prefers well-drained, slightly alkaline to acidic loam or sand and partial shade. Fruit are edible and does attract birds.

Buttonbush is a 4-20 ft. shrub/small tree of wetland habitat. Insects, bees, and hummingbirds use the nectar, wood ducks use it for nesting, waterfowl and song birds utilize the seeds, and deer browse the foliage.

# 2017 Belmont SWCD Tree Seedling Sale

Thursday, April 20 & Friday, April 21, 2017 from 11:00 a.m. – 6:00 p.m.

45420 Roscoe Road St. Clairsville, OH 43950 (**Belmont SWCD building at the New Fairgrounds**). Pre-orders are encouraged due to limited supplies. First come, first served. Any orders not picked up by Friday, April 21, 2017 at 6:00 p.m. will be considered a donation to the Belmont SWCD.

## **Red Oak**

One of the fastest growing oak trees that provides excellent fall color with very few dead lower branches, if any. It is an ideal timber and wildlife tree. It is tolerant of many soil conditions and does well on north-facing slopes. It will reach 60-80- feet.

## **White Oak**

An excellent timber and wildlife tree. It is slower growing, but long lived and is tolerant of many soil conditions and reaches 60-80 feet.

## **Burr Oak**

Is one of the slower growing oaks. Acorns mature first year and are the largest of any North American oak. It is fire and drought resistance. Grows 100 feet.

## **Black Walnut**

A rapid growing tree that prefers deep, moist, and well-drained soils. The nuts are consumed by humans and wildlife. Also, it can be used for timber. It reaches 70 feet.

## **Domestic Apple**

Deciduous tree growing to 30ft. The flowers that bloom from April to June are hermaphrodite (have both male and female organs) and are pollinated by insects. It is noted for attracting wildlife. Prefers well-drained soil.

## **Pawpaw**

An excellent ornamental and wildlife tree that produces edible fruit. It is slower growing, but long-lived. It does best on rich sites and stream bottoms, as an understory component and grows to 40 feet.

## **Bitternut Hickory**

This tree is frequently found in dry uplands or moist valleys in association with other hickories and oaks. The nuts are bitter. Grows to 80 feet tall.

## **Persimmon**

Known for its ripened fruit, providing food for animals and humans alike in mid to late autumn is used for golf club heads and billiard cues. It is adaptable to a variety of soil and moisture, and polluted conditions and grows to 50 feet tall.

## **Redbud**

Is a small tree in which branches grow outward rather than upward. It is frequently used as an ornamental bloomer in spring with bright pink flowers. It grows well in moist, but not wet soils. Average height is 40 feet.

## **Dogwood (White Flowering)**

One of the most popular ornamental trees with early spring flowers and red fruits and crimson foliage in autumn. It prefers evenly moist, well-drained, fertile, deep soils of acidic ph in partial sun. It may reach 30 feet wide and 15 feet tall.

## **Sugar Maple**

Valued for its syrup production and hard, dense, fine-grained and difficult-to-split wood, which is utilized for floors, furniture, veneer, musical instruments and railroad ties. A favorite shade tree with reliable fall color may reach 80 feet.

## **Black Elderberry**

Is a large shrub or small tree with irregular crown with clusters of white flowers and small black or purple berries. Prefers wet soils in open areas near water at forest edges. Elderberries are used for making jelly, preserves, pies, and wine.

## **Colorado Blue Spruce**

Fine for ornamental and Christmas trees. It displays a blue or green-silver short needle. It prefers moist, acidic soils, but not poorly drained or wet. Grows to 50 feet tall.

## **White Pine**

A native pine, classed as a “soft pine”, is the only 5-needled pine in the eastern U.S. It is an important for timber, excellent ornamental tree, windbreak or for wildlife habitat. It performs best in evenly moist, rich, well-drained, acidic soils in full sun. It is fast growing.

### **Miscellaneous Items**
